### [Sustainability Management - NewportBay.s4s.com](#)

What a beautiful wiki, and what marvelous tools. Congratulations.

Here in Vancouver BC, we are working on a similar "collaboration portal" for planning and managing watersheds. Alas, the nature of the work supported by our websites hides the content behind passwords and private groups, but I will be happy to give you a guided tour of:

- [NewportBay.s4s.com](#)
- [FraserBasin.s4s.com](#)

### [CalSWIM Wiki Launch](#)

Welcome to the CalSWIM wiki! We've been working really hard over the past 3 months to extend and customize [XWiki](#) so that it can support a community of people interested in sharing knowledge and data about water resources in California via an open but trustable information infrastructure.

Besides the standard XWiki features, we added a [Google maps plugin](#) , that allows you to include maps on your pages and plot your data on those maps, an [Excel plugin](#) that allows you to draw charts on your pages from Excel attachments, and a [relational database plugin](#) that allows anyone with a publicly accessible database to share that data with the CalSWIM community so that everyone else can [create pages with data from those databases](#) . ...
