

State Water Resources Control Board

Introduction

The goal of this space is to show how a water-related agency can link its database to CalSWIM and make it public using CalSWIM's wiki features. The data is out-dated and are provided by "State Water Resources Control Board". The data is hosted on another server and is registered in CalSWIM under nickname [TrungDB](#) .

Sampling Stations

The following map shows location of sampling stations. You can zoom the map for better views. In addition, by clicking on each of the stations you would see its name.

```
#mapFromDB("TrungDB", "Select Name, Latitude, Longitude FROM Station")
```

The following is the list of the **first 30** stations. By clicking on each of them you would be redirected to the details page of that station:

Name	Code
-------------	-------------
