

## ***Studies***

This space of CalSWIM is open index but closed content, meaning that anyone can add their own pages and place them in this index, but those pages cannot be changed by others. Please consider submitting your study, report, or opinion article here.

To create a new entry in this Studies space, include the title and author(s) in the index first, alphabetically. Then link the index entry to the new page. If the study is large, we strongly suggest authors create a space for it, instead of a single page. Studies that are not linked in this index will likely be missed by web viewers.
